Esri resources for your organization

Course introduction

Course introduction
Course goals
Installing the course data
Training Services account credentials
Icons used in this workbook

1 GIS data and CAD data

Lesson introduction
Properties of GIS data
Properties of CAD data
Compare GIS data and CAD data
GIS data and CAD file organization in ArcGIS Pro
Exercise 1: Examine GIS data and CAD data in ArcGIS Pro
- Open an ArcGIS Pro project
- Explore GIS data in the Catalog pane
- Explore CAD data in the Catalog pane
- Examine GIS data in a map
- Examine CAD data in a map

Lesson review
Answers to lesson 1 questions

2 Managing CAD data

Lesson introduction
CAD file formats
CAD data in ArcGIS
CAD file properties
Adding CAD data in ArcGIS Pro
Exercise 2: Add CAD files to a map
- Open an ArcGIS Pro project

View the CAD data properties
Add the CAD data
Explore the CAD attribute table
Control the layer visibility
Group by CAD layers
Lesson review
Answers to lesson 2 questions

3 Georeferencing CAD data

Lesson introduction
Spatial reference in ArcGIS
Comparing coordinate systems for CAD data and GIS data
Georeferencing CAD data
Assigning a spatial reference system
Exercise 3: Georeference CAD data in ArcGIS Pro
Open an ArcGIS Pro project
Explore the spatial reference of CAD data
Georeference a CAD file by using control points
Apply the world file to another CAD file
Lesson review
Answers to lesson 3 questions

4 CAD symbology

Lesson introduction
Symbolizing CAD data
Applying symbology to CAD layers
Exercise 4A: Modify CAD symbology in ArcGIS Pro
Open an ArcGIS Pro project
Explore the CAD data
Change the symbology of CAD layers
Convert the map to a 3D scene
Map text for CAD data
Exercise 4B: Create a map with CAD in ArcGIS
Open an ArcGIS Pro project
Explore CAD annotation

Work with a subset of CAD data
Apply custom symbology to a CAD layer
Add a map frame to a layout
Lesson review

5 GIS workflows using CAD data

Lesson introduction
Working with subsets of CAD data
Editing techniques using CAD data
Editing with CAD data
Exercise 5A: Modify features using CAD data
Open an ArcGIS Pro project
Use CAD features to split a GIS polygon
Use CAD features to construct GIS features
Copy CAD features and paste them into a GIS feature class
Geoprocessing workflows using CAD data
Using CAD data in geoprocessing workflows
Exercise 5B: Use CAD data in geoprocessing workflows
Open an ArcGIS Pro project
Find where CAD features and GIS features intersect
Create proximity zones
Perform an overlay analysis
Lesson review
Answers to lesson 5 questions

6 Converting CAD data into GIS data

Lesson introduction
Benefits of converting CAD files into GIS data
Considerations for conversion
Conversion process for CAD data
Converting CAD data into GIS data
Field mapping of attributes during conversion
Field mapping of attributes
Exercise 6: Create GIS data from CAD data in ArcGIS Pro
Open an ArcGIS Pro project

Convert CAD layers into a new feature class
Convert geometry
Append CAD polylines to an existing feature class
Append CAD points to an existing feature class
Lesson review

7 Converting GIS data into CAD data

Lesson introduction
Use cases for converting GIS data into a CAD format
Conversion process for GIS data
Converting GIS data into CAD data
Exercise 7: Convert GIS data into CAD data
Open an ArcGIS Pro project
Review the GIS attributes
Add CAD fields to the GIS dataset
Populate the attribute fields
Export the GIS data
Add the CAD dataset to a map
ArcGIS for AutoCAD
Lesson review
Answers to lesson 7 questions

8 Sharing CAD data

Lesson introduction
Sharing CAD data to ArcGIS Online
How to share CAD data to ArcGIS Online
The value of sharing CAD data to ArcGIS Online
Exercise 8: Use shared CAD data in ArcGIS
Open an ArcGIS Pro project
Prepare CAD data
Share CAD data
Analyze CAD data
Verify published data
Export CAD data
Lesson review

Appendices

Appendix A: Data license agreement
Appendix B: Acknowledgments
Appendix C: Answers to lesson review questions
Appendix D: Additional resources
Appendix E: Lesson stories
