Course introduction

Course introduction

Course goals

Installing the course data

Icons used in this workbook

1 Editing in ArcGIS Pro

Lesson introduction

Editing GIS data

ArcGIS Pro editing workflow

ArcGIS Pro editing environment

Application and project settings for editing

Exercise 1: Configure ArcGIS Pro for editing

- Start ArcGIS Pro and open a project

- Update the default measurement units

- Investigate autosave settings

- Change the map's coordinate system

- Set layer selectability and editability

Sharing editing settings

Lesson review

Answers to lesson 1 questions

2 Preparing to edit GIS data

Lesson introduction

Editable features

Lining up data

Exercise 2A: Create an editing map

- Configure a new map

- Explore spatial reference options

- Add operational layers

Symbolize operational layers

Tracking changes in ArcGIS Pro

Exercise 2B: Enable editor tracking on a feature class

View data attributes

Enable editor tracking on a feature class

Make an edit

Lesson review

Answers to lesson 2 questions

3 Creating 2D features

Lesson introduction

Feature creation workflow

Feature templates

Types of feature templates

Managing feature templates

Choose a construction method

Exercise 3: Create 2D features using feature templates

Open a new project and zoom to a bookmark

Investigate how symbology affects feature templates

Use a feature template to create new geometry

Create attributes for your new feature

Create a preset template

Create a new set of features using a preset template

Lesson review

Answers to lesson 3 questions

4 Maintaining spatial integrity

Lesson introduction

Snapping

Reference grid

Constraints

Undo/redo stack

Exercise 4: Use placement tools to create features

Create new features

Undo and redo actions

- Prepare the editing environment
- Use snapping to create new polygons
- Use on-screen constraints and snapping to create a polygon
- Add attributes to new features

Lesson review

Answers to lesson 4 questions

5 Modifying 2D features

Lesson introduction

Evaluate geometry for modification

Feature modification workflow

Modification tools

Exercise 5: Modify existing features

- Relocate a point feature

- Modify polygon shapes

- Continue a line feature

- Combine two features

Lesson review

Answers to lesson 5 questions

6 Editing attributes

Lesson introduction

Managing attributes

Investigate attributes

Using geodatabase schema in attribute edits

Exercise 6: Edit attributes in ArcGIS Pro

- Add data to a new map

- Investigate attributes

- Examine geodatabase schema

- Add attributes to a new feature

- Update attributes to existing features

- Calculate field values

Lesson review

Answers to lesson 6 questions

7 Using topology

Lesson introduction

Using map topology

Exercise 7A: Use map topology while editing

- Enable map topology

- Use a topology to modify coincident point and line features

- Use a topology tool to eliminate polygon overlaps

- Use a topology tool to remove gaps

Geodatabase topology

Comparing map and geodatabase topology

Exercise 7B: Use geodatabase topology to maintain spatial integrity

- Investigate topology rules

- Validate a topology

- Locate errors

- Fix a topology error

- Mark an error as an exception

- Use editing tools to fix an error

- Use a predefined fix to correct a data error

- Correct topology errors

- Revalidate a topology

Lesson review

Answers to lesson 7 questions

8 Editing annotation

Lesson introduction

Text on a map

Creating annotation

Modifying annotation

Using the Attributes pane to modify annotation

Exercise 8: Edit annotation in ArcGIS Pro

- Create feature-linked annotation

- Create a new annotation feature class

- Create standard annotation

- Modify annotation position
- Edit annotation text
- Change text using the Annotation tool
- Modify annotation rotation and position
- Use vertices to modify annotation features

Lesson review

Answers to lesson 8 questions

9 Creating and modifying 3D features

Lesson introduction

Points, lines, and polygons in 3D

3D models in ArcGIS Pro

Creating multipatch data in ArcGIS Pro

Modifying 3D data in ArcGIS Pro

Exercise 9: Create and modify multipatch data in ArcGIS Pro

- Prepare the ArcGIS Pro scene

- Sketch a new multipatch feature

- Rotate a 3D feature

- Add a new face to an existing multipatch feature

- Extrude a multipatch face

- Create new faces using interactive guides

Lesson review

10 Implementing the editing workflow

Lesson introduction

ArcGIS Pro editing workflow review

Implementing the editing workflow

Comparing the feature creation and modification workflows

Exercise 10: Apply the feature editing workflow

- Prepare the editing environment

- Modify feature geometry

- Create new features

- Exercise solution with steps

Lesson review

Answers to lesson 10 questions
Exercise 10 solution

Appendices

Appendix A: Data license agreement
Appendix B: Answers to lesson review questions
Appendix C: Additional resources
Appendix D: Lesson stories
