Esri resources for your organization

Course introduction

Course introduction

Course goals

Installing the course data

Icons used in this workbook

1 Imagery in ArcGIS Pro

Lesson introduction

Imagery for military applications

How is imagery used?

Types of imagery collection platforms

Imagery in ArcGIS Pro

Choose the right imagery

Exercise 1: Assign spectral ranges

- Review imagery

- Determine spectral ranges

- Assign spectral ranges

- Examine the updated image

Lesson review

Answers to lesson 1 questions

2 Visualizing oblique imagery

Lesson introduction

Oblique imagery

Oblique imagery usage

Coordinate systems for image analysis

Image metadata

Interpreting image metadata for analysis

Exercise 2: Visualize oblique imagery

- Display imagery

- Annotate features in the imagery

- Examine imagery

- Lesson review

- Answers to lesson 2 questions

3 Analyzing oblique imagery

- Lesson introduction

- Mensuration tools and accuracy

- Elevation and mensuration

- Examine metadata for mensuration

- Mensuration techniques

- Importance of oblique imagery

- Exercise 3: Mensurate oblique data

 - Evaluate an image

 - Conduct your analysis

 - Set the Mensuration Results pane properties

 - Edit mensuration descriptions

 - Display the measurement feature class

- Lesson review

- Answers to lesson 3 questions

4 Change detection for operations

- Lesson introduction

- Operational change detection

- Raster functions for change detection

- Common raster functions used in the defense industry

- Change detection

- Sensor impacts on change detection

- Preprocessing for image calibration

- Exercise 4: Perform a change detection analysis

 - Prepare your map

 - Perform a visual analysis

 - Preprocess images for analysis

 - Calculate change using raster functions

 - Evaluate change over time

Lesson review

Answers to lesson 4 questions

5 Principles of image classification

Lesson introduction

What is image classification? (Terrain categorization)

Image classification types

Image classification methods

What is deep learning?

Deep learning tasks for image analysis

Improving classification

Choosing a classification workflow

Lesson review

Answers to lesson 5 questions

6 Performing unsupervised pixel-based classification

Lesson introduction

Unsupervised pixel-based classification

Exercise 6: Perform an unsupervised pixel-based classification

- Configure your classification workflow

- Train the classifier

- Classify the image

- Assign classes

- Add new classes and subclasses to the schema

- Assign the remaining class values

- Reclassify mixed and misclassified pixels

Workflow review

Answers to lesson 6 questions

7 Performing supervised object-based classification

Lesson introduction

Supervised object-based classification

Exercise 7: Perform a supervised object-based classification

- Add input data

- Evaluate the study area

- Configure the Training Samples Manager
- Collect training samples
- Save training samples
- Create a classifier definition
- Create a classified thematic layer
- Reclassify pixels
- Extract the target class

Using image classification

Lesson review

Answers to lesson 7 questions

8 Motion imagery analysis

- Lesson introduction
- Uses of motion imagery
- Motion imagery in ArcGIS Pro
- Motion imagery in ArcGIS Pro
- Exercise 8: Use motion imagery for intelligence analysis
 - Prepare a project
 - Examine a video
 - Measure speed
 - Measure travel distance
- Motion imagery in 2D and 3D
- Lesson review
- Answers to lesson 8 questions

Appendices

- Appendix A: Data license agreement
- Appendix B: Answers to lesson review questions
- Appendix C: Additional resources
- Appendix D: Lesson stories
