Table of Contents

Esri resources for your organization

Course introduction

Course introduction
Course goals
Installing the course data
Training Services account credentials
Icons used in this workbook

1 Building a foundation for spatial data science

Lesson introduction
Spatial analytics and data science
Confidence in conducting spatial data science
Spatial analytics and data science case studies
Types of spatial statistics
Interpreting inferential statistics
Geospatial AI
Lesson review
Answers to lesson 1 questions

2 Data engineering

Lesson introduction
Data Engineering view in ArcGIS Pro
Exercise 2A: Identify when to use the Data Engineering view
    Start ArcGIS Pro
    Explore the data
How to evaluate data
Evaluating data for data preparation
Creating charts in the Data Engineering view
Interpreting data using charts
Exercise 2B: Prepare data using the Data Engineering view
    Add data to ArcGIS Pro

Evaluate the data for cleaning
Prepare the data for visualization
Create charts to visualize data
Lesson review
Answers to lesson 2 questions

3 Clustering

Lesson introduction
Heat map versus hot spots
Clusters and outliers
Descriptive versus inferential statistics
Analyzing spatial patterns
Exercise 3: Use spatial statistics to analyze spatial patterns
Open an ArcGIS Pro project
Locate directional trends in data
Run the Average Nearest Neighbor tool
Run the Spatial Autocorrelation tool
Perform optimized hot spot analysis
Perform optimized outlier analysis
Lesson review
Answers to lesson 3 questions

4 Space-time analysis

Lesson introduction
Incorporating time into your analysis
Space-time analysis
Emerging hot spot analysis
Conducting a space-time analysis
Exercise 4: Explore space-time pattern mining tools
Create a space-time cube
Run an emerging hot spot analysis
Run a local outlier analysis
Create a space-time cube layer
Visualize the emerging hot spot analysis result in 3D
Visualize the local outlier analysis result in 3D

Forecast future values
Review forecasting result
Lesson review
Answers to lesson 4 questions

5 Regression analysis

Lesson introduction
What is regression?
Regression equation
Analysis using linear regression
Checkpoint
Exploratory regression
Exercise 5: Find a properly specified regression model
Open an ArcGIS Pro project
Perform exploratory data analysis
Use the Generalized Linear Regression tool
Evaluate the spatial output from the GLR tool
Create a scatter plot matrix
Run the GLR tool on multiple dependent variables
Reviewing OLS model outputs
Lesson review
Answers to lesson 5 questions

6 Multiscale geographically weighted regression

Lesson introduction
How relationships change over space
Multiscale geographically weighted regression characteristics
When to use MGWR
MGWR in action
Exercise 6: Perform MGWR
Run GWR using a properly specified model
Map coefficients to see variation over space
Predict using GWR
Lesson review

Answers to lesson 6 questions

7 Presence-only prediction

Lesson introduction
What is presence-only prediction?
Presence-only prediction workflow
Accuracy of data inputs for prediction
Exercise 7A: Train a presence-only prediction model
    Open an ArcGIS Pro project
    Explore the input data
    Train a presence-only prediction model
    Explore model outputs
Interpreting presence-only prediction outputs
Exercise 7B: Make a prediction using a presence-only prediction model
    Review model output diagnostics
    Predict future habitat locations
Lesson review
Answers to lesson 7 questions

8 Geostatistical interpolation

Lesson introduction
What is interpolation?
Differentiate between regression and interpolation
Geostatistical interpolation
Geostatistical interpolation workflow
Examine the Geostatistical Analyst Interpolation toolset
Approaches to geostatistical interpolation
Exercise 8: Perform exploratory interpolation
    Open an ArcGIS Pro project
    Explore the data distribution
    Perform exploratory interpolation analysis
    Evaluate the results
    Examine a predicted surface
The Geostatistical Wizard
Lesson review

Answers to lesson 8 questions

Appendices

Appendix A: Data license agreement
Appendix B: Answers to lesson review questions
Appendix C: Additional resources
Appendix D: Lesson stories
